

Numab Therapeutics AG is an expanding, clinical stage Swiss biotech company based in Wädenswil, canton of Zürich. The company is focused on the discovery and development of innovative, antibody fragment-based therapeutics with a focus on immuno-oncology. With our breakthrough antibody-discovery and multi-specifics engineering platform, we engage in proprietary projects as well as collaborative research on behalf of partners in the pharmaceutical industry.

To support our clinical trials with the timely production and delivery of high-quality test items, we are looking for an ambitious and qualified individual as

Clinical Drug Supply Manager

In this position you will be responsible for forecasting Investigational Product (IP) supply requirements for multiple clinical trials world wide and leading the IP distribution process. In addition, you will manage the nonclinical drug supply for development programs. Activities of the successful candidate include planning, production and material management, logistics, and distribution. This role applies to internally sourced studies and partnered studies.

Your Responsibilities

- Definition and execution of an optimal clinical trial supply strategy based on clinical study protocol and clinical development plans for IP and ancillaries
- Organization of external CMOs to ensure supply continuity to patients
- Manage operations, transport, distribution and inventory
- Performance of activities on time and within budget
- Maintenance of quality and compliance with regulatory authority regulations through all activities
- Provides input and data for regulatory filings
- Actively communicates, collaborates with and contributes to other functional areas and across functional teams

Ideal candidates will have

- Practical experience in pharmaceutical / biotechnological industry with relevant experience in clinical logistics and supply management
- Solid understanding and experience with Interactive Response Technologies (IRT)
- Knowledge of relevant regulations (e.g. GMP, GDP, ICH)
- Good knowledge about the drug development process
- Basic project management, good organization and planning skills
- Proven problem-solving and idea generation skills
- Ability to prioritize and manage multiple tasks simultaneously, to identify and resolve issues, and effectively manage timelines

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a permanent position in an innovative environment as well as a competitive compensation package including a participation in the company.

We are looking forward to receiving your application with reference number NB069 to hr@numab.com.
