

Numab Therapeutics AG is an expanding, clinical stage Swiss biotech company based in Horgen, canton of Zürich. The company is focused on the discovery and development of innovative, antibody fragment-based therapeutics with a focus on immuno-oncology. With our breakthrough antibody-discovery and multi-specifics engineering platform, we engage in proprietary projects as well as collaborative research on behalf of partners in the pharmaceutical industry.

To develop Numab's growing proprietary therapeutic pipeline we are looking for a highly motivated and experienced individual for a role as Research Technician/Associate within our Protein Engineering team.

## **Research Technician/Associate Protein Engineering 100%**

In this position, you will be involved in the purification and biophysical characterization of antibody hit and lead candidates. You will contribute to the development of antibody-derived therapeutic proteins applying methods from a variety of disciplines.

### **Your Responsibilities**

- Expression, purification and characterization of antibodies and antibody fragments
- Generation of high-quality data in biochemical assays to support Numab's discovery projects
- Compiling data in order to support engineering of antibody fragments
- Contribution to technology development projects
- Planning, execution, analysis and presentation of experiments within team meetings and company presentations
- Work closely with team members to outline next steps and help to drive the projects to completion
- General organization of the laboratories, evaluation and acquisition of equipment and consumables

### **Ideal candidates will have**

- Completed apprenticeship as laboratory technician or a higher education in biology, (bio-)chemistry or pharmaceutical sciences, preferably with industry experience in recombinant antibody production and characterization
- Professional experience in protein biochemistry, molecular biology, protein engineering, purification and protein analysis
- Hands on experience in high throughput methods for protein purification and chromatography is a plus
- Highly accurate and team-oriented working style paired with a high sense of quality
- Ability to work on diverse challenges independently
- Refined computer user skills (Windows, MS Office) and communication skills

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a permanent position in an innovative environment as well as a competitive compensation package including a participation in the company.

**We are looking forward to receiving your application with reference number NB098 to [hr@numab.com](mailto:hr@numab.com).**
